

Chronotherm® IV Plus Programmable Wireless Thermostat Zoning Simplified!

Has the need for added wiring prevented you from offering the advantages of retrofit zoning? Then here's some good news: Honeywell introduces a new RF wireless thermostat. You'll like the way it simplifies installation for multi-zone applications.

Research shows that zoning market potential is huge—and largely untapped. With the new RF thermostat, it's easy to meet customer demand for the room-by-room comfort of zoned temperature control. In addition to the RF thermostat for the zoning market, Honeywell also offers the standalone RF thermostat. The standalone RF thermostat offers homeowners new convenience and portability, and it's easy to install.

Boost customer satisfaction and grow your business today, with the Honeywell RF thermostat!

The Chronotherm® IV Deluxe Programmable Wireless Thermostat
It's sleek, wireless, and quick to install wherever it's convenient. Use with single-zone receiver, or with multi-zone receiver for zoned control of up to three areas.

The W8665A receiver is for single-zone conventional applications. The W8665E receiver works with up to three thermostats in a multi-zone application.

Homeowners benefit with Zoning

Zoning Offers:

Comfort... Solves the problem of some rooms being too warm while other rooms may be too cold.

Convenience... No longer will you have to go to the hallway or dining room to adjust the temperature for the bedrooms.

Conservation... Save up to 30% on heating and cooling bills.

Common Sense... You wouldn't put up with just one light switch in your home. Enjoy the convenience and comfort of a thermostat in every zone of your home.

Wireless RF Thermostat

All the features homeowners want!

- Sleek styling, bright LCD display
- Mount where convenient
- Pre-programmed temperature settings
- Proven energy-savings program
- Easy temperature setpoint changes

Applications

The T8665A Thermostat provides electronic control of 24 Vac heating and cooling systems. It must be used with a W8665 Receiver. The W8665A can be used with 1H/1C single-zone conventional applications. The W8665E can be used for up to three zones with a Honeywell EMM-3 Electronic MiniZone® Panel, EMM-3U Universal Electronic MiniZone, or TotalZone™ Panel.

Operation

The T8665A Thermostat sends radio frequency signals to the W8665 Receiver Module. It uses a pulse code modulation that won't interfere with other wireless systems.

Easy setup and customization

- The T8665 Thermostat uses no wires
- Can be mounted in each zone of living space, up to 200 feet from the receiver
- Up to three thermostats can be used with W8665E receiver
- Standard applications don't require changing factory settings
- System test simplifies troubleshooting and saves time

Enter the profit zone

with the Chronotherm® IV Wireless Thermostat and multi-zone receiver

Surveys say...
the demand for zoned temperature control is really heating up!

- Homeowners ranked zoned heating and cooling among the top of most-wanted home features.* (Inconsistent temperatures within the home are a consistent homeowner complaint.)
- Zoning is the best way to provide room-by-room comfort control.
- Energy-efficient zone controls will continue to grow in popularity, according to a study by the National Association of Home Builders.
- Honeywell is the leader in complete, easy-to-install zoning solutions. Make your customers more comfortable. Boost your profit margins. Offer Honeywell zoning solutions today!
